

## GS Deluxe LED Vet Dental Unit

The iM3 GS Deluxe LED sets the standard for veterinary dental machines. The unique iM3 design is your guarantee of many years of dependable service backed by our industry leading 5 year warranty on the dental control top and industry leading tech support.

The GS Deluxe LED is a complete dental system with advanced features not found on any other dental machine. The industry first self generating LED light Advantage high speed handpiece removes the need for troublesome fibre optic wiring, expensive krypton bulbs, switches and transformer. The low speed handpiece and nose cone swivel for comfort and reduces strain on the hand. The GS Deluxe is fitted with two coolant bottles. One for the CLS Solution and the other for water. Maintenance instructions are printed on the back of the machine right where you need them.

### Stainless Steel Instrument Tray

Stainless steel instrument tray provides added storage and the ideal location. The S/S instrument tray is height adjustable and removable.

### Magnetic Bur Holder

The iM3 designed magnetic bur holder prevents burs from falling on the ground, they are held in place right where you need them. The Corian(R) surface is impervious to bacteria and easy to clean unlike fibreglass and plastics.

### Adjustable Coolant Flow Valve

The machine features an adjustable coolant flow valve allowing the user to regulate the amount of coolant from the high speed handpiece.

### Oil Free Compressor

The covered oil free compressor makes cleaning a breeze. iM3's unique technology means the compressor air is cooled on the way to the dental machine. The side of the compressor is left open to allow adequate ventilation, no continuous running fans are required.

### Low Speed Swivel Handpiece

Low speed swivel handpiece reduces hand fatigue. The ability to change straight nose cones (SNC) allows for a variety of procedures to be performed, not just polishing. The GS Deluxe is provided with a 4:1 SNC that uses the unique R&R oscillating prophyl angle. The R&R is pre lubricated and wont trap muzzle hair.

### Three way syringe

Three way (air, water and mist) syringe is a useful instrument for washing away debris from the mouth. The tip is removable and autoclavable and can be rotated 360 degrees. The use of CLS in the dental machine allows easy application of chlorhexidine into the mouth during dental procedures.

### U3019 GS Deluxe Dental Base

### LED High Speed Handpiece Illumination

Light in the mouth is a must.

### **LED Advantage High Speed Handpiece**

The new LED Advantage high speed handpiece is the most advanced in the world. It requires no electricity, just air to produce the brightest daylight quality LED white light in the industry with the largest illumination area. Triple coolant spray provides necessary cooling of the tooth and bur. The patented hygiene head helps to eliminate bacterial suckback and cross contamination.
